Customizable UI Replacer Changelog

v5.4 for Legendary Edition

v2.0 for Special Edition

Changes from 5.3 to 5.4

- Compatibility for Less intrusive HUD.
- Updated to last version of SkyHUD (v090B for LE v090.1B for SE).
- Added new icons for Gold, Carry Weight, Time and Level.
- Removed Crosshair textures to avoid unnecessary bugs.
- Removed, ESO glossy - Dark Souls Glow (health bar bug) presets.
- Changed Level UP Meter for Main/Classic presets.
- Added a new configuration HUD for Dragonborn preset.
- Added Compatibility patch inside fomod for Display Enemy Level.
- Lower font size in Main/Classic/Dragonborn presets about 25%.
- Fixed Enemy large names issue (e.g. OBIS).
- Fixed missing crosshair issues.
- Added new Placement Images in the mod folder to show the settings for each preset.

How to update

If you are going to keep using the skyhud version then follow these steps

1. Backup your current SKYHUD.TXT if you have custom values you want to keep.

2. Uninstall the previous version of SkyHUD

3. Uninstall the previous version of Customizable UI Replacer

4. Install last version SkyHUD.

5. Install last version of Customizable UI Replacer SkyHUD

6. Copy the values of your backup config into the new SKYHUD.TXT in SKYHUD folder. Ignore missing settings where applicable. (ONLY IF YOU HAVE EDITED THE VALUES)

If you are going to use the Less intrusive hud version then follow these steps

- Uninstall SkyHUD
- Uninstall Customizable UI Replacer old versions
- Load your game then save
- Install Less Intrusive HUD
- Install the new Customizable UI Replacer Less Intrusive HUD Version.

If you aren't sure, you can use a save cleaner after you uninstall SkyHUD and Customizable UI Replacer but none of them use scripts.
